2022.23 Final-Year Project - CMP040X301Y

Milestone 01: Project Initiation - Deadline 14th October 2022

Mode: User's name will be logged and shown with answers

1. What is your name?⓵

Waris Khan

2. What is your Student ID?⓵

KHA20489354

3. What Programme are you on?⓵

BSc Computer Science

TELL US ABOUT YOUR PROJECT SO FAR

4. What is the working title of your project (this can be changed at a later date)?⓵

My COVID Diary - Preventing The Spread

5. What is the theme of your project?⓵
- ☐ Application Development (Native: e.g. Android, iOS, Windows, MacOS, Linux, etc.)
- ☐ Artificial Intelligence & Machine Learning
- ☐ Backend Development (Web)
- ☐ Cloud Computing
- ☐ Cyber Security
- ☐ Data Analysis and Visualisation
- ☑ Fullstack Development (Web)
- ☐ Frontend Development (Web)
- ☐ Games and Gamification
- ☐ Networking
- ☐ Other

6. Please give a very brief description of your project.⓵

I will be developing a website where users can record their COVID-19 symptoms on the daily basis and how they are feeling on each day, the website will give tips on what to do depending on the symptom the user is experiencing. It will be a full guideline on what the user should expect next after each day and all data will be stored so we can use it so that the user themselves can see how their health is improving or deteriorating. We can also use it for future research for example when carrying out studies on particular age groups and which are the most common symptoms in each age group. My extension will be develop a program

7. Please outline the main aim(s) of your project. An aim is an expected outcome of your project (e.g., issues it will address, how it might improve or enhance a situation for stakeholders, etc.).⓵

The main problems it will solve is seeing patterns amongst users on the website and see how each individual copes with the virus. Studying patterns is one of the key factors that can reduce the spread of virus, the more we learn about human behaviour the easier it will be to prevent the spread and take new precautions.

8. Please outline some artefact objectives of your project. Your "artefact" is what you are going build, deploy, evaluate etc. Objectives are typically steps/activities that you must complete in order to deliver your project successfully.❗

I will be needing a database so we can easily record cases, will need to do both front and back end development. Make the website user friendly so there is more pictures than text. The website overall will need to be fun and include some activities so the younger audience enjoys the website.

TELL US ABOUT YOUR SUPERVISION PREFERENCES

9. Please indicate your preferred supervisor. NOTE: Your choice cannot be guaranteed as supervisor allocation is based on availability and subject specialism.❗

Yuanlin Gu

10. Have you contacted a prospective supervisor?❗

I am still in the process of contacting a prospective supervisor.

11. Please indicate your preference for a second supervisor (marker). Please select one or more.

- ☐ Alex Collins
- ☑ Arturo Araujo
- ☐ Charles Clarke
- ☐ Fakhreldin Saeed
- ☐ Kimia Aksir
- ☑ Mohammad Ahmad
- ☐ Momina Shaheen
- ☐ Ogechukwu Okonor
- ☐ Pelumi Apantaku
- ☐ Rabail Tahir
- ☐ Wei Li
- ☐ Yuanlin Gu

There are required fields in this form marked ❗ .
